PROFESSIONAL SUMMARY

Computer science student at the University of Missouri specializing in cybersecurity, with hands-on experience identifying and remediating high-severity vulnerabilities in production university websites. Skilled in systems programming, Linux systems administration, and self-hosted server infrastructure. Proficient in Rust, Go, C, and multiple security-relevant frameworks.

EDUCATION

University of Missouri (Mizzou) <i>Bachelor of Science in Computer Science, Specialization in Cybersecurity.</i>	Columbia, MO <i>Expected 2030</i>
Lindbergh School District <i>High School Diploma.</i>	St. Louis, MO <i>2026</i>

EXPERIENCE

Sales Associate <i>Zumiez</i> - Ranked #1 on the store's SPC (highest sales percentage) multiple times, consistently exceeding store targets. - Handled simultaneous responsibilities across sales, floor maintenance, and customer coverage.	2025 – Present <i>St. Louis, MO</i>
Help Desk Technician <i>Lindbergh School District</i> Provided technical support to students and staff through the school's help desk, troubleshooting hardware and software issues.	2024 – 2026 <i>St. Louis, MO</i>
Culinary Employee <i>Grant's Farm</i> Rotated across multiple kitchen and front-of-house roles during high-volume service periods.	2024 – 2025 <i>St. Louis, MO</i>

PROJECTS

University Website Vulnerability Research <i>August 2026</i> Identified high-severity vulnerabilities in production university websites, including authentication forgery, authentication bypass, and MITM credential sniffing, and coordinated responsible disclosure and remediation.	
ihnet2 - Secure Port Forwarder <i>December 2025 - March 2026</i> - Built a secure port forwarding tool enabling any two computers to establish an encrypted connection and forward ports across the internet, using a public-key exchange for connection security. - Implemented in Rust with a focus on security and reliability across arbitrary network configurations.	
Self-Hosted Linux Server Infrastructure <i>March 2026 - Present</i> Self-hosted a Linux server running a VPN, Git server, file server, and media server; managing configuration, security, and administration.	
Advanced Mandelbrot Fractal Renderer <i>August 2025 - December 2025</i> Developed a high-performance fractal renderer capable of rendering advanced Mandelbrot set visualizations.	

ACTIVITIES & LEADERSHIP

Mizzou Computing Association <i>Member</i> Participating as a member of the university computing association during freshman year.	2026 - Present
Computer Science National Honor Society (CSNHS) <i>Member</i> Selected as a member during Junior and Senior years of high school.	2024 - 2026
High School Football <i>Junior/Varsity Lineman</i> Competed at the Junior Varsity and Varsity levels as a lineman for 3 years.	3 years

SKILLS

Systems & Infrastructure: Linux, Server Administration, VPN Configuration, Self-Hosted Services, Server Management
Programming Languages: Rust, Go, C, Zig, JavaScript, HTML
Frameworks & Libraries: Axum, Tokio, libp2p, Tauri, Preact
Languages: English (Native), Spanish (Moderate Fluency)
